PROFESSIONAL SUMMARY

Dynamic Software Developer with proven experience delivering robust web applications, including a Telegram-based Football Fantasy app and the Lendfast finance platform. Skilled in building reusable components, problem solving, and collaborating with cross-functional teams. Committed to creating scalable, user-focused solutions.

EDUCATION

Masai

Full Stack Development

Nov 2025

GH Raisoni College of Engineering

B.E in Electronic and Telecommunication

Jul 2021

SKILLS

Technical Skills: Tailwind CSS, TypeScript, CSS3, HTML5, MongoDB, Express.js, Node.js, Redux, Git, JavaScript, ReactJs

Soft Skills: Adaptability, Time Management, Teamwork, Problem Solving

EXPERIENCE

Futy | *Frontend Developer*

May 2025 - Present

- Developed responsive user interfaces using React and TypeScript
- Optimized UI performance through efficient state management and code splitting
- Collaborated with UX/UI designers to implement pixel-perfect layouts
- Integrated RESTful APIs to enable dynamic data rendering

Capgemini | *Senior Analyst*

Mar 2023 - May 2025

- Developed and maintained scalable frontend modules using React.js, Redux Toolkit, and enterprise design systems
- Integrated REST APIs and optimized asynchronous data flows between microservices and UI components
- Implemented role-based routing and access control with React Router v6 across multiple application views
- Enhanced code quality and test coverage through unit testing with Jest and React Testing Library

Capgemini | *Analyst*

Aug 2021 - Mar 2023

- Delivered technical support for Windows-based applications in RDS environments
- Resolved performance issues and addressed user queries to ensure system reliability
- Collaborated with cross-functional teams to optimize application configurations
- Enhanced uptime and efficiency of critical business systems through proactive troubleshooting

PROJECTS

QuickShow | *React, Express, Tailwind, Clerk, Node.js*

-  Deployed Link : <https://github.com/shubham007x/QuickShow>
-  Github Repo : <https://github.com/shubham007x/QuickShow>
- Contributed to building a full-stack movie and event ticket booking platform using the MERN stack (MongoDB, Express.js, React, Node.js).
- Implemented real-time seat booking functionality with live availability updates and responsive user interface enhancements.
- Integrated secure, passwordless user authentication and session management using Clerk.
- Developed role-based access controls, enabling separate dashboards for users and admins to manage bookings and show listings.
- Utilized serverless event handling with Inngest and followed modular architecture for maintainable, scalable code.

Lendfast | *React, TypeScript, Tailwind, Shadcn*

-  Deployed Link : <https://lendfast.vercel.app/broker/dashboard>
- Developed and refined modular UI components such as CustomCard, Header, and ActionButtons using React and Tailwind CSS.
- Implemented responsive layouts and consistent visual design across multiple devices with Tailwind CSS for optimal user experience.

- Integrated interactive popovers and tooltips to present key information intuitively while maintaining a clean interface.
- Designed and applied skeleton loaders to improve perceived performance during asynchronous data loading processes.
- Ensured accessibility by adding proper focus styles, contrast, and touch support to interactive UI elements.
