Professional Summary

Frontend-focused Full Stack Developer with 3+ years of experience building scalable, production-grade web applications using React.js, Next.js, Node.js, Express.js, and MongoDB. Strong expertise in REST API design, state management, authentication, and performance optimization. Proven ability to collaborate in Agile teams and deliver high-impact features used by thousands of users.

Core Competencies

Frontend Architecture • Full Stack Development • REST API Design • State Management (Redux Toolkit, TanStack Query) • Authentication & Authorization • Performance Optimization • Responsive Design • Agile/Scrum

Technical Skills

Languages: JavaScript (ES6+), Java

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Redux Toolkit, TanStack Query, Framer Motion

Backend: Node.js, Express.js, REST APIs, JWT Authentication

Databases: MongoDB, Mongoose

Tools: Git, GitHub, Postman, Cursor

Professional Experience

Software Development Engineer

Nov 2025 – Current

Wantace, Gurugram

- Built and shipped end-to-end full-stack features using **Next.js, React.js, Node.js, Express.js, and MongoDB**, improving performance and scalability.
- Designed reusable UI components and modular REST APIs following clean architecture principles.
- Implemented JWT-based authentication, MongoDB schema design, and query optimization to reduce API response times.
- Actively participated in sprint planning, code reviews, and cross-functional collaboration with product and design teams.

Frontend Developer

May 2025 – Aug 2025

Futy, Remote

- Built PlayFuty's Telegram Mini App and marketing website using React.js, supporting **8,000+ active users**.
- Developed an Admin Panel managing **1,000+ matches, teams, and players** with role-based access control.
- Contributed to a cross-platform mobile application using React Native integrated with Node.js REST APIs.
- Collaborated with QA and backend teams; tested APIs using Postman and resolved production issues.

Senior Analyst (Frontend Focus)

Mar 2023 – May 2025

Capgemini, Pune (Hybrid)

- Developed and enhanced frontend modules for enterprise-scale applications using modern JavaScript frameworks.
- Improved UI performance, browser compatibility, and accessibility across multiple modules.
- Refactored legacy codebases to improve maintainability and reduce long-term defects.
- Worked in Agile delivery environments with designers, backend engineers, and product owners.

Analyst

Aug 2021 – Mar 2023

Capgemini, Mumbai (Hybrid)

- Supported large-scale enterprise applications with focus on UI stability, performance monitoring, and incident resolution.
- Resolved production incidents within SLA timelines and performed root-cause analysis.
- Coordinated with infrastructure and support teams to improve application reliability.

Projects

QuickShow — Movie Ticket Booking Platform

Role: Full Stack Developer

Tech Stack: React.js, Node.js, Express.js, MongoDB, Tailwind CSS, Clerk

- Built a full-stack movie and event ticket booking platform using the MERN stack.
- Integrated Clerk authentication and implemented real-time seat selection and booking history.
- Designed backend APIs for bookings, notifications, and seat availability.
